**Notes**

I included the 'Zero member' clubs separately. My thought is that perhaps most of them won't renew so they would have a larger than desirable impact on the percentages of clubs being reported. Notably **49 clubs** are at risk of being suspended at the end of **June** for having not yet met minimum membership requirements of this semi annual reporting period

**\*\* That's a drop from 112 in December, to 98 in January and now to only 49 clubs** at risk of being suspended

A year ago we had **84%** of clubs below charter strength. That has improved to **79%** at June 30
